A unique company

500 km West from Paris, on the North coast of Brittany, SETALG started back in 1985 as one of the French seaweed pioneers.

SETALG has developed a unique expertise in the **sourcing** and **processing** of natural ingredients for Feed, Food, Nutraceutical and Cosmetic applications.

A unique location

Located in the heart of Europe's largest algae beds, SETALG's unique natural environment is listed **Natura 2000** site by European authorities.

This direct access to resources originates in the combination of **unique natural factors** :

- Record tidal range : 13 meters high / 3 km long / twice a day.
- Beneficial action of the Gulf Stream

To preserve this **biodiversity**, SETALG maintains the Goémoniers' **hand-harvesting** seaweed collection. This regional family tradition is handed down from generation to generation.

Total quality commitment

Our **technological know-how** combined with high performance industrial machinery guarantees a **total commitment** to safety, quality and traceability:

- All products are tested for eye and skin irritation
- All analyses are carried out by independent and accredited labs
- All products are formulated according to international cosmetic standards.

Our target

100% customer satisfaction

Expert in powder cosmetics

SETALG offers a wide range of **natural ingredients** and **formulated products** in powder form which are divided in 3 categories:

- Bases
- Standard
- Tailor-made

A receptive and flexible team develops **customized solutions** by adapting textures with actives, colours and fragrances to create exclusive treatments for the **most famous international brands**.

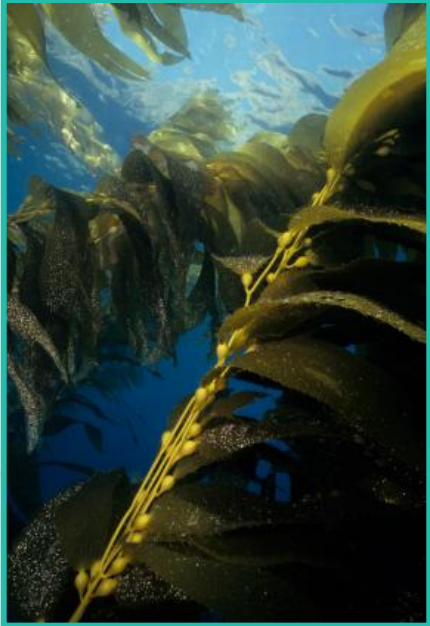

Key advantages of powder products

- Absence of preservatives
- Long shelf-life
- Cost-effective transportation / storage
- Short development time

Ingredient range

Seaweeds

Halophyte plants

Natural Ingredients

Natural Exfoliants

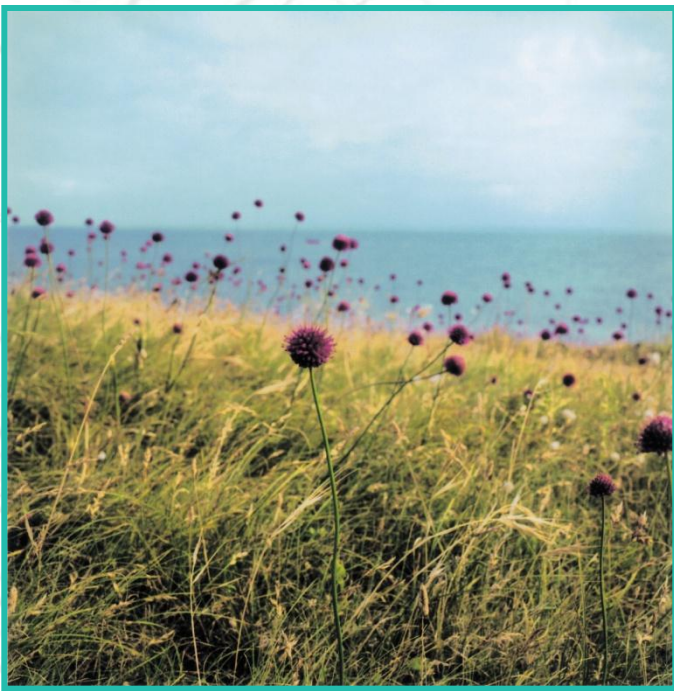

Extracts

Ingredient range

Seaweeds

After harvesting, seaweeds are cleaned, dried, cut or ground into different mesh sizes. SETALG algae are **100% natural**, processed without additives, preservatives nor genetically modified. Seaweeds are widely used as natural ingredients in **face & body treatments**.

Halophyte plants

Halophytes are marine plants that naturally grows in saline environment. SETALG offers you Halophytes collected from its 20 ha cultivated field located in the west part to Brittany. Marine plants are traditionally used in cosmetic formulations as **extracts** and **essential oils**.

Ingredient range

Natural Ingredients

SETALG collects unique ingredients for their high **trace element**, **vitamin** and **mineral** levels such as : salt, clay, marine magnesium, spray-dried and liquid seawater...

Natural Exfoliants

SETALG has selected several **natural ingredients** as exfoliants: seaweeds, salt and oyster shell powder to fit any type of cosmetic formulation.

Extracts

SETALG has 3 standards extracts but can as well offer **customized** dry extracts.
